

ICTAS®

International Compliance Trained Agency Scheme

It has become increasingly important for UK-based agencies to have an up-to-date knowledge of both the ABPI Code of Practice and other national Codes that operate across the European region. In fact many pharmaceutical companies are making it a contractual requirement that agency staff is compliance trained on a regular basis. To address this issue, and in response to requests from our clients, we developed the **International Compliance Trained Agency Scheme (ICTAS®)** in 2012.

Who is eligible to join ICTAS®?

Agencies that have received training from PharmaCodes during the past year or are about to receive training from PharmaCodes will be eligible to join ICTAS®.

Outline of the scheme

The scheme is flexible and cost effective for all sizes of agency. All training materials used are accredited for Continuing Professional Development by an external CPD agency.

Benefits of ICTAS® membership

- Annual compliance training
- Demonstrate your competence and awareness of international compliance to your clients by using the ICTAS® logo on your agency website, advertisements and business proposals.
- Access to eCodes, the online decision support tool. This has content organized by 'job category' and 'type' for instant access to comprehensive advice about the 2016 ABPI Code.
- Monthly ABPI case review summaries of all of the cases published by the PMCPA during the previous month and any key learning points that can be derived from them. The cases are delivered in a PowerPoint presentation with speakers' notes attached. These may be used without restriction within your company.
- Discount on services and fees (when applicable) e.g. for attendance at open courses.
- Agency Certificate of Membership and Certificates of Attendance for all trained staff.
